Reference letter for Ales Huzik

To whom it may concern:

Ales Huzik was contracted full-time early march 2015 till October 2016 to work as the lead full stack clojure developer for Filemporium PTY LTD on ourmedian, a public file management platform. Ales now has full-time employment at Atlassian, however is still working casually on our project after hours/on the weekends.

Apart from having a broad range of hard skills, his soft skills were very impressive too. He was always punctual to our daily stand-ups, worked on the weekends, was easy to get along with, respective of his peers and a team player.

I would highly recommend Ales as a Tenant.

If you would like to acquire further information about Ales's time spent at ourmedian, please don't hesitate to contact my mobile or email.

Sincerely,

Arunshangar Sri Nanthakumar
