Reference letter for Ales Huzik

To whom it may concern:

Ales Huzik was contracted early march 2015 till October 2016 to work as the lead full stack clojure developer for Filemporium PTY LTD on ourmedian, a public file management platform. Throughout this period Ales has shown great strength, skill and commitment in re-architecting, re-coding, setting up our platform. He also was very active in interviewing, settings test objectives and hiring quality clojure developers, who are still with us today.

His contribution to the entire software development life cycle, creating maintainable code, code reviews, pairing, design updates, setting up servers are a few of the outstanding tasks we at ourmedian appreciated.

Apart from having a broad range of hard skills, his soft skills were very impressive too. He was always punctual to our daily stand-ups, worked on the weekends, was easy to get along with, respective of his peers and a team player.

Anyone to have such a nice and talented person like Ales, is truly at an advantage.

If you would like to acquire further information about Ales's time spent at ourmedian, please don't hesitate to contact my mobile or email.

Sincerely,

Arunshangar Sri Nanthakumar
